

Why Choose a Career in the Insurance Industry?

Stability

As long as people continue to drive cars, own homes or run businesses, insurance will be a part of our lives. For that reason, you'll have a hard time finding a career with a more stable outlook.

Opportunities

Multiple analysts predict a shortage of insurance industry professionals in the near future. Recent studies indicate that 25 percent of the workforce will retire by 2018 opening up a vast amount of employment and advancement opportunities.

Make a Difference

A career in the insurance industry offers you an opportunity to help others during their time of loss. Each day presents a new opportunity to assist individuals when they are most in need.

Flexibility

Few careers can offer you the amount of flexibility that a career in the insurance industry can. As an independent agent, for example, you serve as your own boss and have the ability to control your schedule.

Insurance Impacts Your Everyday Life

Whether you realize it or not, insurance plays a role in all our lives. It's a part of everything you do - from the health insurance policy you use to see your doctor when you're feeling ill, to the property insurance used to cover your home and all your valuables, and the liability insurance coverage you are required to carry on your vehicle in case you are involved in an accident.
