This is not good for current BCBSLA medicare supplement policy holders such as myself. I am "grandfathered" into Plan F which is no longer offered - and no doubt this change over will allow them to cancel my Plan F. Additionally - since it would change over to the benefit of stockholders instead of policy holders - after this 1st year where they misleadingly say nothing will change - we know that as soon as next year rolls around - our policies will change for the worse with higher premiums, higher co-pays, higher deductibles, and worse policies and worse benefits by far than we have now. This is a horrible deal and smacks of Louisiana politics at it's worst - which in itself is quite a feat! By the way - where are they getting all the \$ to run all the ads all over Print, Radio, TV, Direct Mail, & Email?!
